

Subject: Executive Summary of Professional Roles & Justification for International Travel Request

To Whom It May Concern,

My name is Christopher Taylor, and I am currently under supervised probation with travel restrictions imposed by the court. I respectfully submit the following summary in support of a motion to allow international travel—and possible modification of travel-related conditions—due to my active roles in several international ventures that directly contribute to my capacity to generate income for restitution and fulfill all court-mandated obligations. Since being sentenced, I have remained on the right path, fully focused on rebuilding my life and regaining the trust of others. I began this journey even before reporting to prison. While others passed the time watching TV or working out, I dedicated myself to planning how I would use my experience, what I had learned, and how I could apply it toward the future—particularly with the rapid advancement of technology, an area I have remained at the forefront of.

I took full responsibility for my actions early on and have learned from my mistakes. Since then, I have worked to transform those lessons into positive, forward-thinking actions. This commitment is reflected in the initiatives I am actively engaged in today. I am not just trying to move forward—I am working every day to contribute meaningfully to the world around me.

To further these efforts, I respectfully ask to be given greater responsibility and the opportunity to continue progressing. I believe I have demonstrated that I can be trusted, as seen in the emails from both the AUSA and my probation officer expressing their support. I now ask the Court to consider extending that same trust to me by granting this request. The following roles are ones currently serve in as an employee of Mood LTD LLC to their direct client relationships.

1. ID Future Stars (IDFS): Acting Contract CTO/CDO

As Acting Chief Technology Officer and Chief Digital Officer under contract with ID Future Stars (IDFS), I oversee all technology strategy, AI integration, digital infrastructure, and systems automation. IDFS is an international education services firm committed to creating college readiness programs, mentorship, and global education access.

I architected and lead implementation of:

- “Are You the One?” Global Education Access Program
- AI Immersion Curriculum (certifying students in predictive analytics, digital literacy, and AI ethics)
- Online LMS platforms integrated with ClickUp CRM and education analytics

These programs are live in both the U.S. and Asia and involve partnerships with schools, families, and local educational institutions. My role requires frequent travel to:

- Oversee implementation and stakeholder presentations
- Secure new contracts and investment agreements
- Conduct site visits for student immersion programs and AI training hubs

My services are paid through The Sikat Agency, under a Managed Services Agreement with IDFS.

2. The Sikat Agency: Chief Technology & Strategy Officer

As CTO and Chief Strategy Officer of The Sikat Agency, I manage international contracts focused on digital transformation, AI, and education marketing. Our agency acts as a service backbone to ventures such as IDFS, risc.ai, and Pasajobs, executing branding, backend integration, and technical rollouts.

Through this role, I also lead:

- AI-driven content and marketing systems for IDFS and Pasajobs
- System integration with educational platforms and investor dashboards
- Coordination with strategic partners and legal/compliance stakeholders

I am directly responsible for global client-facing deliverables, many of which require in-person meetings, technical presentations, and site launches in Asia and the U.S.

3. Pasajobs: CTO Advisor and Strategic Investor Consultant

I currently serve as CTO Advisor and Advisory Board Member to Pasajobs, the Philippines' largest referral-based job platform. My role is secured through a paid Managed Services Contract via The Sikat Agency.

Key responsibilities include:

- Advising on AI infrastructure and roadmap implementation

- Designing education-to-employment pipelines for national rollout
- Coordinating with government and university partners to onboard talent from IDFS

My involvement includes strategic site visits, system audits, and investor meetings, which are critical to meeting contractual milestones and compliance standards.

4. Risc.ai: Strategic Lead – Global Health & Education Infrastructure

I am actively engaged as a technical and strategic lead for risc.ai, a platform integrating AI into preventive healthcare, biogenetic testing, and predictive analytics. In partnership with its founders and core team, my focus is on leveraging risc.ai technology to:

- Improve cost-efficiency in preventive care through AI-assisted diagnostics
- Enable real-time analytics for drug therapies and genetic screening
- Support national education systems with health data integration and early detection

We are currently launching pilot programs in Southeast Asia. As part of this initiative, I am required to travel for:

- Data center and edge-computing site surveys
 - Health system partnership negotiations
 - Government-led consortium planning meetings
-

5. Economic Need and Accountability for Restitution

All of these professional roles are documented and executed under signed contracts. They form the basis of my current and future income—income that is directly tied to my ability to meet the restitution ordered by the court.

Delays or barriers to fulfilling these professional obligations not only endanger contract execution but could also jeopardize long-term income streams that support my restitution payment plan.

Furthermore, my track record with the U.S. Probation Office includes:

- Consistent travel notifications and early returns

- Timely updates on location and contact information
 - No violations or absences from restitution progress reports
-

Supporting Documentation

Upon request, I can provide:

- Copies of all signed contracts with IDFS, Pasajobs, The Sikat Agency, and risc.ai
 - Letters from stakeholders confirming my required role and travel expectations
 - Financial records showing revenue generated from these partnerships
 - Compliance reports and Probation Office correspondence showing ongoing good faith efforts
-

Formal Request

Based on the above, I respectfully request that the Court:

1. Grant approval for international travel to the Philippines and other countries as needed for business execution
2. Modify my conditions of probation to allow standing pre-authorization for international travel tied to contracted work
3. Transition to restitution-only supervision, maintaining compliance with financial obligations and check-ins, while lifting restrictions that hinder my ability to work

Sincerely

, _____

James Christopher Taylor
